

Post Type Generator

i [General](#) [Post Type](#) [Labels](#) [Options](#) [Visibility](#) [Query](#) [Permalinks](#) [Capabilities](#) [Rest API](#)

Overview

Use this tool to create custom code for [Post Types](#) with [register_post_type\(\)](#) function.

Usage

- Fill in the user-friendly form.
- Click the "Update Code" button.
- Copy the code to your project.
- Or save it as a snippet and share with the community.

Examples

If you are still learning how to use this tool, check out the following examples:
