

Sauvegarde

comment sauvegarder un site WordPress

Sauvegarder un site WordPress

Quand faire une sauvegarde?

- dès que nous considérons risqué de perdre des données

Que faut-il sauvegarder?

- **1- l'ensemble des fichiers (via FTP ou le cPanel)**
- **2- la base de données**

Où faire la sauvegarde?

- ne pas se fier aux sauvegardes de notre hébergeur
- sortir les sauvegardes du serveur où le site est hébergé

[Help review the plugin!](#)Télécharger
les 2 fichiers

Sauvegarder ces 2 fichiers (le **.zip** et **installer.php**) dans un endroit sûr sans modifier leurs noms, ainsi que son **nom d'administrateur** du site et son **mot de passe**!

 sauvegarde >

 20240108_cinetim_ffacc9c491d4e9df2888_20230305163888_archive.zip
 installer.php
 motsdepasse.txt

Se faire au moins 2 copies dans des endroits différents est aussi une bonne idée!

- 2 -

**Recréer un site
à partir d'une sauvegarde**

1. Créer une **base de données** et un **utilisateur**
2. Ne **pas** extraire de fichier .zip WordPress
3. Copier les **2 fichiers** de la sauvegarde dans le dossier désiré pour l'adresse du site, par exemple dans :
[usager].dectim.ca/cours/wp/semaine_2/nouveaublogue/
4. Dans un navigateur, aller à l'adresse suivante :
[usager].dectim.ca/cours/wp/semaine_2/nouveaublogue/installer.php
5. Suivre les instructions (voir pages suivantes)

Step 1 of 2: Deployment

This step will extract the archive file, install & update the database.

STATUS

The user **[mdupont_wp_s4_u]** is missing privileges on the database **[mdupont_wp_s4_bd]**
You can continue with the installation but some features may not be restored correctly.

DETAILS

This test checks the privileges of the current database user. In order to successfully use Duplicator all of the privileges should pass. In the event the checks below fail, contact your hosting provider to make sure the database user has the correct permissions listed below.

Note: In some cases "Create Views, Procedures, Functions and Triggers" will not pass, but continuing with the install will still work. It is however recommended that a green pass on all permissions is set when possible. Please work with your hosting provider to get all values to pass.

TABLE PRIVILEGES ON [mdupont_wp_s4_bd]

Create	Pass
Select	Pass
Insert	Pass
Update	Pass
Delete	Pass
Drop	Pass
Procedures (Create & Alter)	Warn
Functions (Create & Alter)	Warn

TROUBLESHOOT

- Validate that the database user is correct per your hosts documentation
- Check to make sure the 'User' has been granted the correct privileges
 - [How to grant user privileges in cPanel](#)
 - [How to grant user privileges in phpMyAdmin](#)
- [\[Additional FAQ Help\]](#)

► Tables Flagged for Removal or Backup

Notice

❗ The system validation checks help to make sure the system is ready for install.
During installation the website will be in maintenance mode and not accessible to users.

*It is not recommended but possible to continue with the installation before
the problems indicated in the validation have been solved.*

☒ I have read and accept all [terms & notices](#)*

* required to continue

Step 2 of 2: Test Site

 Admin Login

Click the Admin Login button to login and finalize this install.

☒ Auto delete installer files after login to secure site (recommended!)

⚠ FINAL STEPS: Login into the WordPress Admin to remove all [installation files](#) and finalize the install process. This install is NOT complete until all installer files have been completely removed. Leaving installer files on this server can lead to security issues.
